### ***Monthly Jobs Report***

#### **Revised October and Preliminary November Jobs Figures Released**

INDIANAPOLIS (December 22, 2006) – The number of jobs in Indiana is now 28,200 higher than in January of this year, and up 47,200 from January of 2005 according to figures released today by the Indiana Department of Workforce Development.

Indiana's seasonally adjusted job figures indicate a revised October total of 2,987,900 jobs while preliminary figures for November indicate 2,988,300 jobs. In January, 2006, the number stood at 2,960,100, and was 2,941,100 in January 2005.

The state's non-seasonally adjusted job totals for November now stand at 3,017,300, the highest level since September, 2000.

The payroll employment statistics used in the jobs report is calculated through a monthly survey of 7,500 Hoosier employers and is based on reported payroll figures. It is an estimate of non-agricultural jobs in Indiana businesses and does not include self-employed or agricultural workers.

#### **Seasonally Adjusted Figures**

The nation's seasonally adjusted figures show that U.S. employment grew by 132,000 jobs with strength in most major sectors of the economy except construction and manufacturing. Employment has grown by 1.8 million when compared to November 2005. The greatest number of jobs was added in professional & Business services, education & health services and leisure & hospitality.

Meanwhile, Indiana remains approximately 25,600 jobs off its peak, which was reached in May of 2000. The number of jobs in Indiana according to October revised data was 2,987,900, whereas November preliminary figures were 2,988,300. Seasonally adjusted employment changed little from last month. Gains in trade offset by manufacturing losses that were concentrated in motor vehicle body and trailer manufacturing and fabricated metals. .

Overall, of eleven supersectors, three gained jobs while five declined and three were unchanged. Over the year employment is higher by 12,800 jobs with only manufacturing posting a significant decline.

#### **Non-Seasonally Adjusted Figures**

Indiana's November preliminary non-seasonally adjusted payroll estimates indicate 3,017,300 jobs for the state, while October's revised total reported 3,014,800 jobs.

Employment Growth was slightly less than the most recent 12-month average due to light hiring in the health care & social assistance component of educational & health services. Hiring in trade and layoffs in leisure & hospitality traced recent trends while manufacturing and government shed slightly more jobs than normal for November. Layoffs in the construction industry were lighter than usual over the month.

**Non-Seasonally Adjusted Metropolitan Statistical Areas**

Preliminary job figures in the state’s Metropolitan Statistical Areas (MSA) for October with last month’s and last year’s job numbers:

<b>MSA</b>	<b>Nov. 06</b>	<b>Oct. 06</b>	<b>Nov. 05</b>
Anderson	44,400	45,000	45,300
Bloomington	84,400	84,400	84,600
Columbus	44,200	44,000	43,600
Elkhart-Goshen	131,900	132,100	130,200
Evansville	181,200	181,300	180,200
Fort Wayne	219,200	219,100	218,400
Gary	282,400	281,800	281,300
Indianapolis	902,800	902,100	896,100
Kokomo	47,800	47,700	47,900
Lafayette	95,200	94,900	95,500
Michigan City	48,500	48,500	47,900
Muncie	53,300	52,900	54,000
South Bend	148,500	148,200	150,000
Terre Haute	75,800	75,600	75,500

The Department of Workforce Development is charged with continually improving the Hoosier workforce by assisting companies to create new jobs and improve employee skills. The agency offers a variety of training and educational grants, partners with Indiana’s 26 WorkOne Centers, administers the unemployment insurance system, provides labor market information, assists employers with preparing workers for layoffs and closures and operates a statewide job placement service.

Technical Notes:

- Payroll employment is calculated through a monthly survey of 7,500 Hoosier employers and is based on reported payroll figures. It is an estimate of non-agricultural jobs in Indiana businesses and does not include self-employed or agricultural workers.
- The survey that calculates the payroll employment estimate is conducted by the U.S. Bureau of Labor Statistics and is conducted during the week of the 12<sup>th</sup> of the month.
- In calculating employment figures, two different types of calculations are provided. The first, *non-seasonally adjusted*, provides information without taking into account the effects of seasonal trends. In calculating the *seasonally adjusted* information, employment that follows more or less a regular pattern each year, including holiday or summer employment is factored out of the estimate. The adjustments make it easier to observe the cyclical and other non-seasonal movements.
- For the most accurate analysis, please use revised data sets and not preliminary estimates.
